## Work

### PHP Developer

#### *Metropolis Software*

- 2008 – 2010
  - Built WordPress themes
  - Maintained WordPress sites.
  - Developed a web shop based on WordPress
  - Managed hosting for about twenty sites.
  - Maintained Joomla sites.<br>

### MEAN stack Developer

#### *Polska Grupa Energetyczna*

- 2010 – 2014
  - Worked closely with the product team as a MEAN stack developer to build new features for the desktop and mobile site.
  - Gained unique experience working on a large-scale software project with hundreds of contributors. Learned extensively about release engineering, including testing and deployment, as well as common web security vulnerabilities.
  - Built the necessary features for the public launch in their back-end Node.js/Express.js startup.
  - Developed a server-side Node.js RESTful API application.
  - Built the initial AngularJS concepts and components for app.

### Project Manager

#### *CTL Logistics*

- 2014-2016
  - Architected and led development in a team to build a Spotify-like application for a Series-A funded startup using Node.js, Electron/Chromium, and React.js.
  - Built a bidirectional shipping integration API with Ruby on Rails for a very large affiliate network corporation.
  - Managed an outsourced, overseas engineering team using Agile practices.
  - Built a large front-end for a tax compliance platform with AngularJS and Bootstrap.
  - Consulted for an early-stage startup and worked in a team to develop a single-page application using ReactJS, Flux, SASS, and ES6.
